

RAYMORES

On January 26, Raymores surprised his followers with disco sounds. The song "Ordinary Love" doesn't match Raymores' usual music genres, however, it fits his style.

The musician and producer Raymores has once again released a song that stands out for its elegant and successful fusion. We find pop, funk, disco and urban sounds packed into a dance-friendly melody and beat. The role of the Anglo-German singer Anna Stumpf couldn't be less important. She originally wrote the song as a singer-songwriter and recorded it just before she moved near the North Pole. Afterwards Raymores arranged, recorded, mixed and mastered the song, as we find it today. In 2020 the album "Click!" with 10 songs of the world-rock genre and in 2021 the single "Brillos", a contemporary salsa, took the Raymores trio to national and international stages, radio and television programs.

Raymores is Ivan Raymores. Later he joined Instinto, another important band in the history of Panamanian national rock. The artist resides in Spain, where he has dedicated himself to music production for the last 20 years.
